

**AirPhoton's Division of Air Quality and Exposure Science,
in partnership with Diamond Medical Laboratories,
are pleased to announce our new
Residential and Office Space Airborne Covid-19 Screening Program**

- Are you concerned that Covid-19 may be in the air of you home or office space? Then this environmental service is for you.
- This program is tailored for property owners, buyers, sellers, landlords, airbnb renters', and realtors who wish to further reduce their own and clients' risk of Covid-19 infection.
- The sampler can be located any where in the home or office space.
- The collected sample is then analyzed by PCR at an FDA approved laboratory. The turn around time for results is typically 24-48 hours.
- If a sample tests positive, you know that someone who was present during sampling was infected with Covid-19, and contact tracing and testing can be initiated. An assessment of the home or office ventilation and HVAC should also be conducted.
