

Division of Air Quality and Exposure Science Services

- Airborne Covid-19 screening in indoor spaces, inc. transit and airports.
- Consulting on Covid-19 safety protocols.
- Public and occupational exposure monitoring to hazardous air pollutants, e.g. Covid-19, other airborne pathogens (bacteria, viruses, mold), gases and particulate matter.
- Indoor air quality measurements.
- Air exchange measurements to calculate air changes per hour
- Ambient, criteria, non-criteria, hazardous air pollutants, air toxics and GHG measurements.
- OSHA Respiratory Protection Programs. OSHA Respirator Fit-Testing (qualitative and Quantitative).
- Provision and management of turn-key ambient air quality monitoring stations.
- Air quality instrument design and fabrication.
- Meteorological measurements and modeling.
- Industrial and ship emissions monitoring and characterization.
- USEPA AERMOD air dispersion modeling.
- Source apportionment modeling of size-resolved particulate matter mass and number concentration.
- Life cycle assessment of industrial GHG emissions.
- Landfill gas and leachate monitoring.
- Engineering and environmental controls.

Other services

- Phase I and II Environmental Impact Assessments in support of Property Development.
- Environmental analytical chemistry.
